

BRINGING TOGETHER SCIENTISTS WORKING WITH COLLECTIONS OF LIVING MICROBES

VISION

Facilitate the safe and responsible utilization of microbial resources for research, education, industry, medicine, and agriculture for the betterment of humankind by providing opportunities for U.S. culture collection workers to engage with each other and with the broader culture collection community.

MISSION

USCCN seeks to optimize the quality and availability of microbial resources and become a central resource for U.S. microbe culture collections and their users.

PARTICIPATE IN USCCN AND HELP FACILITATE THE UTILIZATION OF MICROBIAL RESOURCES FOR RESEARCH, EDUCATION, INDUSTRY, MEDICINE AND AGRICULTURE

- Connect with a community of your peers
- Collaborate with other culture collection managers and industry participants
- Make your collection visible to the community
- Browse the USCCN collection registry
- Gain greater access to collections of all types
- Benefit from USCCN links with international networks
- Participate in USCCN meetings, webinars and workshops
- Access publications, news reports, blogs and more on the USCCN website
- Access information on best management practices, protocols, regulatory submissions
- Stay informed about new advancements and opportunities in the field
- Connect and collaborate with companies interested in developing products based on specimen in your collection
